MACHINE LEARNING DEVELOPER

Proven Machine Learning Engineer with a track record of success in crafting and implementing ML models for real-world applications. Skilled in harnessing advanced algorithms, such as CNNs and XGBoost, to deliver effective solutions. Committed to ongoing learning, and dedicated to staying current with the latest trends in AI. Enthusiastic about contributing expertise to drive precision in ML for impactful outcomes. Let's connect and delve into opportunities in AI and ML together.

SKILLS

Machine Learning	Deep Learning
Python	Database Management
Data Analysis	SQL

WORK EXPERIENCE

KRG CONSULTANTS   **DEC 2023 - Present**
IT Intern

As an IT Intern at KRG Consultants, I played a pivotal role in a collaborative team of 12 to develop a dynamic recruitment website from inception to implementation. Utilizing ReactJS for the frontend, Python for the backend, and MySQL for database management, we successfully created a live website with seamless functionality. Additionally, I contributed to the integration of AI components, enhancing the platform with resume analysis capabilities. This experience sharpened my skills in web development, teamwork, and the integration of cutting-edge technologies to deliver a robust solution.

PROJECTS

CV Analyis & Personality Prediction using Machine Learning

Developed a transformative project utilizing Machine Learning algorithms for Curriculum Vitae (CV) analysis and personality prediction. Leveraged NLP, diverse ML models like like XGBoost, SVM and K-Means , and ethical considerations, revolutionizing talent acquisition methodologies.

EDUCATION

BE, Artificial Intelligence & Machine Learning
SIES Graduate School of Technology
2021-2025

CERTIFICATIONS

ByteCamp Hackathon 2023

Student's Developer Program at SIES GST for Deep Learning

Python for Data Science, NPTEL
